

AMPHENOL

SUSTAINABILITY

GOALS

GHG Emission

Based on the 2021 GHG emission baseline (Scope 1&2) , a cumulative cut of 100,000 tons in GHG emission shall be achieved by 2025 (Achieved) . A cumulative cut of 250,000 tons in GHG emission shall be achieved by 2030.

Waste

Zero waste to land fill across our operations/sites

Renewable Energy

By the end of 2030 100% Renewable energy in manufacturing

Safety

Deliver enhanced training on our health and safety

Green Material

Use more Recycled Materials
Reduce and reuse cardboard and plastic package
Achieve PFAS free

Water

By the end of 2030, reduce total water withdrawal by 15% compared to 2021 levels
